# Achilles Group Basic Policy on Fire Prevention and Disaster Response

Fire prevention and disaster preparedness are fundamental and critical management priorities in business operations.
The occurrence of fires or natural disasters not only threatens the lives of employees but also has the potential to cause significant damage to stakeholders, including customers and local residents, and could jeopardize the company's very existence.
The Achilles Group takes these risks seriously, routinely prepares for emergencies, and implements measures to protect management resources and the local environment.
Furthermore, we prioritize disaster prevention as our foremost objective. Should a disaster occur, we will respond promptly and appropriately, dedicating our full efforts to prevent the escalation of damage. We will also devote maximum effort to initiatives aimed at early recovery.
